

Asbestos Removal Notification Form (2015 National Building Code of Canada)

Information and Drawing Requirements

This form must be completed and submitted to the Building Official prior to the issuance of a building and development permit for the demolition, alteration or renovation of a building that may contain asbestos containing material (ACM). Older buildings, especially those constructed in or prior to 1983, may contain asbestos.

Project Name:

Project Address:

(Check applicable box below.)

- Materials having the potential for releasing asbestos fibres have been removed from the project area in accordance with Saskatchewan Occupational Health and Safety (OH&S) Regulations.
OR
- Asbestos removal is planned as part of this renovation or demolition project. Attach details.
OR
- Asbestos containing materials will not be disturbed or removed as part of this project.

Frequently Asked Questions:

Q: Do I need a building permit to perform asbestos abatement work?

A: No. A building permit is not a permit to perform asbestos abatement work. Rather, this form is required as part of your building permit application and serves as notification to ensure the safety of building inspectors. Limited demolition or construction is expected during asbestos abatement work and jurisdiction for this work is with the Government of Saskatchewan. Provincial OH&S may be contacted at 1-800-567-7233.

Q: Who is responsible for identifying asbestos containing materials?

A: The owner is responsible for identifying asbestos containing materials that are present in a place of employment and with which workers may come into contact with ACM.

Q: What happens if I find asbestos after I already have a building permit?

A: In the event that asbestos is discovered, you are expected to:

1. Immediately stop work;
2. Contact the Building Official; and
3. Address the asbestos that has been encountered by providing notification as required by OH&S and ensuring asbestos will be dealt with according to OH&S requirements.

Information regarding asbestos containing materials in buildings may be found at the following:

- <http://www.saskatchewan.ca/business/safety-in-the-workplace/hazards-and-prevention/asbestos-in-saskatchewan/understanding-identifying-and-handling-asbestos>
- Drawing of an older home with potential sources of ACM is depicted on the reverse side of this form.
